Test Cases :

Functional Test Cases:

These test cases focus on verifying the functionality of the Facebook login page, ensuring that the features work as expected.

1. **Valid Login Test Cases:**
   - **Test Case 1:** Login with valid email and valid password.
   - **Test Case 2:** Login with valid phone number and valid password.
2. **Invalid Login Test Cases:**
   - **Test Case 3:** Login with invalid email and valid password.
   - **Test Case 4:** Login with valid email and incorrect password.
   - **Test Case 5:** Login with invalid email and invalid password.
   - **Test Case 6:** Login with an empty email and valid password.
   - **Test Case 7:** Login with a valid email and an empty password.
   - **Test Case 8:** Login with empty email and empty password.
3. **Additional Test Cases:**
   - **Test Case 9:** Login with a correct email but an expired password.
   - **Test Case 10:** Forgot Password link functionality.
   - **Test Case 11:** User clicks on "Create new account."
4. **UI Test Cases:**
   - **Test Case 12:** Verify login page UI elements.
   - **Test Case 13:** Verify the "Log in" button functionality.

Non-Functional Test Cases:

These test cases focus on verifying aspects of the login page that are related to its performance, usability, and overall user experience.

1. **Performance Test Cases:**
   - **Test Case 14:** Login page load time.
   - **Test Case 15:** Login attempt under high load (multiple concurrent users).
